

Technical Requirements

Suono o son desto?

Group

Concert for solo voice accompanied by a variety of ethnic instruments.
The performance is about an hour long.

Requirements

The performance requires no amplification and can take place in various spaces; ideal are little churches but also auditoriums or other rooms, it can also take place outside.
A well-protected adjacent room is needed, where the voice can be warmed up without disturbing and without being disturbed.
Non-carbonated water and glasses.

Sound

Only where the acoustics allows it can the performance take place without amplification (prior visit required).

Amplified, the performance is designed for smaller to medium-sized rooms as well as for outside. If the space is bigger, a powerful sound-system is required.

I will bring and install the following equipment:

2 panoramic microphones AKG C414

Bayer Dinamics microphone with a voice condensor
digital mixer

1 Schertler monitor

2 speakers for a total of 500 Watt

Lights

The performance requires no particular lighting, however, the light should support a very comfortable, warm atmosphere. Neon lights must be avoided.

Where possible I ask for 2/4 coloured lights: yellow/orange and blue/green.

Stage Area

2 meters wide and 2 meters deep.

Stage Set-up, Sound Check and Rehearsal

3 hours

Dismantling of stage

1 hour
